

Mondial Color - Company Profile

Headquartered in Italy, Mondial Color designs, develops and manufactures high quality coatings which fully satisfy the most demanding requirements of many clients spread all over the world.

Since 1980 Mondial Color has stood out from the crowd thanks to the excellent adhesion, anti-corrosion and stress-resistance performances of its products, which derive from a careful selection of raw materials and an advanced know-how in manufacturing. Nowadays, the main objective of Mondial Color is being a step ahead in the design and development of more and more performing solutions, that meet the most severe requirements in terms of operators' safety and health, reduction of carbon-footprint and improvement of the coating process in the general industry.

One of the main assets of Mondial Color's mission is satisfying customers' requirements by upgrading the overall performances of the final products through a continuous investment on people, know-how, infrastructures and technologies. Every year, we reinvest the majority of our revenues in our R&D department as well as in our production facility.

Mondial Color aims at developing and producing high quality coating solutions, bearing in mind the specific needs of each sector which it collaborates with:

- **General Industry** (*Protecta* – different coating cycles according to ISO-12944)
- **Architecture and Construction** (*Archtech* – solutions suitable for architects' needs)
- **Interior Design** (*Krea* – varnishes specifically designed to improve the beauty of designers' ideas about furniture and ornaments)
- **Cutting Tools** (*Glider* – cutting-edge solutions to reduce friction and improve accuracy of blades, drill bits, cutters, shears and others)
- **Fashion Industry** (*ProGlass* – chosen by the biggest European fashion brands to protect and beautify their metallic finishes)
- **Military&LE** (*Topshield* – higher performances in the lower thickness for an undestroyable layer of resistance to stress and scratches)

One of the main features of Mondial Color's work ethic is the development of *ad hoc* products, for very specific applications which require maximum carefulness and commitment. Flexibility and open-mindedness, continuous research in heterogeneous sectors and the company's large knowledge capital make the difference and allow high level of product customisation even on large projects.
